

Warning lights with LED or Solar

Indispensable to any building.

No battery required!

The warning lamp es equipped with LED light material and is therefore even lighter.

This means through the low power consumption of the LED light source a higher light duration.

Unilaterally

Red

Yellow on both sides

- For outdoor use
- LEDs for good, large-scale lighting
- Includes NiCd battery 2400 Ah/2,4 V with built-in overcharging and low-end protection
- Operating time with fully charged battery for about 16 hours
- Can be switched to flashing or lighting
- The battery is charged during the day by the solar cell
- Fixing the warning lights with bolts, or hex bolt
- Warning light on swivel base
- Suitable for standard beacons, shooting 40x40 mm
